

**The National Jet Boat Association Presents
The 1st Annual Motorhead Madness Show**

Who we are: Founded in 1969 the NJBA is the oldest active drag boat racing association in the world. The NJBA is a non-profit organization dedicated to promoting the sport of drag boat racing. The NJBA puts on 7 races every year in California, from March until November, and attracts racers from all over the west coast. Everything from 250 mph Top Fuel Hydros to 90 mph river boats come to blast down the NJBA's liquid quarter mile racetrack. Funding for each racing event comes directly from the racers and sponsors.

What this show is all about: We are here to raise money to replace our antiquated drag race timing system. The new system we plan to purchase offers a few new features that our current system doesn't possess, which will enable us to offer staggered starts. The new system will allow us to open up new and exciting classes and eventually, larger payouts to racers that win. The cost of this system is approximately \$30,000. Rather than simply increase the racer fees for competing at NJBA events to pay for the new timing system, we decided to have a benefit boat and car show to raise the money instead.

The Show: Held at beautiful Irvine Lake in Silverado, California, the show will be a relaxing day to check out awesome vintage and modern drag boats, circle boats, and hot rods. There will be a live auction, featuring a huge array of performance auto and marine parts, and a ton of performance vendors selling discounted merchandise. We'll have great food, cold beer and a DJ blasting great music all day long. So come on out to hang with your friends, make some new ones, buy that go-fast part you've been looking for, and check out the drag boats to fire yourself up for the upcoming boating season. You can hear the open headers cackling already, can't you?

- Awards for best of show boat, car, truck and motorcycle awarded to show participants
- live auction: products from sponsors
- silent auction
- excellent prizes will be raffled off
- boat, car, motorcycle and truck displays
- manufacturer row: check out the newest high performance machines from auto and marine manufacturers
